

We make energy *easy.*

As a trusted energy partner, we'll take care of everything from customizing your energy plan to proactively communicating with you along the way.

Here's how it works

- 1 By analyzing one of your recent utility bills, we can **determine your specific energy usage and needs** to find the right solution for your business.
- 2 Using this information, our in-house Supply and Risk team will **develop customized pricing options**.
- 3 Your dedicated representative will connect with you to **review our straightforward contract**, proposed rate, and answer any questions.
- 4 Upon signing the agreement, **you will receive a countersigned agreement from your dedicated rep.** We'll also remind you to contact your current supplier about the switch, if you have not already done so.
- 5 Your dedicated representative will **stay in contact with you throughout the duration of your contract** to make sure invoicing is accurate and proactively offer recommendations, provide useful, ongoing market insight, and address any questions. And, prior to your contract end date, they will touch base with you to discuss renewal options and opportunities.

**ELECTRICITY
SOLUTIONS**

**NATURAL GAS
SOLUTIONS**

**DEMAND
MANAGEMENT**

Whether you're looking to mitigate cost and risk, or you want to make your business more sustainable, you will be supported by a dedicated energy expert (not a broker or middleman) who's committed to your needs well into the future.
